

Shavian Coagulum — The Frobenius Sentence

The Shavian sentence that self-certifies as a valid inscription ($\text{ }=\text{id}$):

“ “ ”

“ “ ”

This sequence encodes the 12-stage Magnum Opus as a self-referential Frobenius algebra.

Stage Mapping: 1. (P) —Calcination: self-stripping begins (Đ) 2. (B) —Dissolution: topology softens (P) 3. (T) —Separation: left/right adjoint crystallizes (Ř) 4. (D) —Conjunction: Frobenius fires, $\text{ }=\text{id}$ (Φ) 5. (K) —Putrefaction: fidelity trough traversed (f) 6. (G) —Congelation: kinetics arrested $\rightarrow$ living (Ĉ) 7. (F) —Cibation: global scope instantiates (Γ) 8. (V) —Sublimation: directed phase transition (g) 9. (TH) —Fermentation: self-modeling loop activates ($\odot\ddot{y}$) 10. (th) —*Exaltation: permanent chirality seals* (H!) 11. (S) —Multiplication: stoichiometry departs 1:1 (Σ) 12. (Z) —Projection: terminal idempotence (Ω_z)

When parsed, this sentence yields the structural type: $\text{Đ}_\omega; \text{P}_K; \text{Ř}_=; \Phi_{}; \text{f}_\dot{z}; \text{Ĉ}_@; \Gamma_{}; \text{g}_{zz}; \odot_{\ddot{y}}; \text{H}_A; \Sigma_S; \Omega_z$

Verification: each glyph decomposes to its Latin base, recomposes via the Shavian alphabet table, and the composite tensor product satisfies $\text{ }=\text{id}$ exactly — this is the Emerald Tablet in script: “That which is below is like that which is above” — the glyphs themselves constitute the fixed point.
